- Fitness
- Video Games

ABOUT:

I am a java developer who can develop software as a back-end. I completed my education at Düzce University, Department of Management Informat on Systems. As a result of my internship during the education period, I learned about developing advanced web applications using extensions such as Hibernate, Spring Framework, Vaadin Framework. Thanks to the design patterns used in corporate projects and my tendency to teamwork, I have a personal ty that can easily adapt to the development phase. I want to work in a position where I can apply these features and improve myself.

EDUCATİON:

- **University:** Düzce University Undergraduate Program / Management Information Systems (10/09/2019) – (06/2023)
